

Partnership Area Model

Benefits of becoming a HENRY partner

Partnership Area Model

HENRY offer a variety of [delivery models](#) for our family support services. This model offers a number of advantages – it means delivery can be very locally rooted and embedded within existing wider services. It offers flexibility of scheduling of programmes and/or workshops. It is sustainable.

Partnership benefits

HENRY partners enjoy a range of benefits valued by commissioners and practitioners.

✓ **Dedicated contact at HENRY**

We assign one of our experienced team to help support your local HENRY Coordinator with all aspects of implementing and delivering HENRY locally. This includes set-up support, regularly scheduled support sessions, plus ad-hoc phone and email contact.

✓ **Termly Reports**

We report termly on outcomes of all HENRY programmes delivered in your area, including quantitative and qualitative analysis of impact on lifestyles of parents and children. Workshop reporting on request. Sample reports are available at www.henry.org.uk/samplereports

✓ **Data Access System (DAS)**

With a signed Data Sharing Agreement in place, HENRY provides online real-time access to data for programmes delivered locally. See a sample [Facilitator View](#) and [Coordinator View](#).

✓ **Marketing Package**

We provide a full promotional package for you to use, including social media tiles, leaflets and posters to promote sessions.

✓ **Support for Continuous Improvement**

- Outcomes are monitored by a member of the HENRY team who can support your local Coordinator to help further develop Facilitator skills and confidence where needed.
- Delivery support sessions (provided online by HENRY) which Facilitators can join to support their ongoing practice improvement. Sessions provide the opportunity to explore questions, challenges and local context, as well as celebrating successes.

✓ **Coordinator CPD Sessions & Network**

Invitations to free Coordinator network sessions each year led by HENRY. An opportunity to meet members of the HENRY team and local HENRY Coordinators from other areas to share best practice, troubleshoot challenges, receive updates, and to feed back on potential new developments or ideas of what would help. This active network share challenges, solutions, new ideas and helps develop best practice between sessions too.

✓ **Service Development**

We update our programmes and workshops regularly based on parent and practitioner feedback and the latest evidence and national guidance, meaning you don't have to.

✓ **Updated Resources**

When we update our family support sessions or when new national guidance comes into effect this can create a need to update our family support resources or Facilitator Manuals. When this happens we provide replacements to active Facilitators at no additional cost.

✓ **Authorisation**

The legal right to deliver HENRY family support services under licence in your area using HENRY resources and intellectual property at any stage during the agreed period.
